Turkish

Native

A courageous and resourceful web developer seeking to leverage his unique skills gained from a combination of formal schooling, world travel and an unyielding dedication to technology and learning. A professional who has the ability to build world-class applications, utilizing past experiences as an entrepreneur and business owner to contribute to any project team needing an energetic and capable full-stack developer.

Web Development Experience and Projects

Coding Dojo (Coding Bootcamp) Resident - Graduated at top of class with highest scores in an immersive programming boot camp where I have attained over 1000 hours of programming experience in technologies and methodologies such as, OOP, MEAN, Python, Java, HTML, CSS, Javascript, MySQL, Postgres, Django, Flask, Express, Apache/Tomcat, and Java Spring.

Ideas (Java) - An application built for users to create and rate ideas as well as see other users ideas. Created a login and registration page using JavaServer Pages (JSP) that stores user information in a MySQL database. Implemented CRUD Operation for user functions. Applied Model View Server (MVC) structure for organizing back-end codes. Technologies used: Java, Spring Boot, BootStrap, MySQL

Blog Page (Python) - A collaborative blogging application that allows users to post and share text and media contents, update and customize profiles and has a built-in search bar that users can search for other posts. Worked on a functioning login and registration component with proper validation that stores objects in the back-end. Utilized BootStrap for design and front-end coding. Technologies used: Python, SQLite, Django, BootStrap

Other Experience

2014-12 - 2018-08

Founder and General Manager

Aydogan, Inc

• Managed large-scale kitchen and bath equipment sales worth up to \$100,000 per project.

• Coordinated customer and vendor relationships during each phase: from providing quotes, development of project's scope, design, implementation and project's closeout.

• Managed financial, administrative and contractual aspects of projects.

• Managed teams of 5 to 15 staff and communicated with each on a daily basis.

• Used innovative software products used in the industry such as 2020 and SketchUp when working with customers and trained staff on their use.

2012-10 - 2014-09

Communications and Public Relations Specialist

Antalya Regional Directorate of Organized Industry

• Managed the development of news briefs, press releases and social media content.

• Developed new advertising strategies collaborating with advertisement groups.

• Planned publicity strategies and campaigns.

• Served as a liaison for the external stakeholders, public representatives and local government members.

Education

2007-09 - 2011-09

Istanbul University

Bachelor of Arts -BA: Digital Communication and Media/Multimedia
